

## KENYA DROUGHT RELIEF PROJECT 2022-2023

Region Mukogondo  
East Ward,  
Laikipia County, Kenya

### Current situation

A multi-seasonal drought is affecting the eastern part of the Horn of Africa, including our partner country Kenya. This drought has been declared the worst natural disaster in 40 years. For the past three years, Kenya has not received any rain for most of the country. Drought-affected populations have experienced consecutive shocks since 2016, including natural hazards, such as drought and flooding, COVID-19, and a locust invasion in 2020.

**In 2021, northwest Kenya experienced the driest conditions and highest temperatures since 1981. This has a devastating impact on vegetation, pasture and water resources.**

Local partner: « ACCREDO » African Centre for Community Resilience, Empowerment and Development

### Background

About 4 million people are facing acute food insecurity and are in need of humanitarian assistance. The drought is affecting all 23 counties in Kenya's arid and semi-arid lands. Some marginalized communities in these counties have little access to basic services and have lost ownership of most of their ancestral lands.
